that human nature was capable of bearing. I have been under the care of the most distinguished physicians, both in this country and in England, visited Bath, Cheltenham, Bristol and Gloucester, tried various specifics, among others a large quantity of Swaim's Panacea, used sulphur baths, &c. &c. As a last resort I was induced to wrap myself in a tar ointment, keep myself secluded, shunned by all, myself also shunning. I was induced to believe my case a hope-lessone.

also shunning. I was induced to believe my case a hopeleasone.

In Angust last, by the advice of friends, I went to the New-York City Haspital, but was there told that my case was incurable. The disease now enveloped my whole body, rendering me almost helpless; the skin thickened and cracked, and blood and matter ran, and life itself became almost a burden. A few weeks since I was induced to use your Sarsaparilla by hearing it so highly recommended, having spent near \$3,000 without obtaining but little relief. After using it a short time I found myself better, and now, by using six or eight bottles, costing me less than ten dollars, I am well. Yes, I certify and declare to the world, that after spending near \$3,000 in traveling and doctoring; and suffering more than can be told, I was perfectly enred by using your invaluable preparation of Sarsaparilla; and I now recommend it te all similarly afflicted. Those wishing to know farther particulars will find me at my residence, No. 27 Warren street, New-York, where I shall be happy to communicate any thing in relation te the above cure.

Sands: Gentlemen—Owing to you a de bt which money cannot pay, I am induced to make a public acknowledgement of the benefit I have derived from your (to me) ledgement of the beacht I have derived from your (to me) invaluable preparation of Sarsaparilla. I was sorely afficted with a terrible scrofulous disease, hereditary in our family, which commenced on my neck, and, continuing to spread, soon reached my ears, ruaning into my head, and extended all over my face, neck, arms, and lower extremities. I became a disgusting object to look upon. At times my distress was so great that I was unable to sleep or lay down, and the disease extending into my ears, seriously atmy distress was so great that I was anable to steep or lay down, and the disease extending into my ears, seriously affected my hearing. My face was one continuous sore, from which a discharge of matter and water kept constantly oping out. People avoided me, supposing I had the small pox, or some other infectious disease, and I was consequently obliged to relinquish my business. Notwithstanding I had the best medical advice, and tried different plans of treatment, the disease to grow worse, until I gave up in despair. Fortunately for me, I chanced to fall in with a lady on board a railroad car while traveling for my health, who informed me that her son was at one time in as bad a condition as I me that her son was at one time in as bad a condition as I was, and that by using your Sarsaparilla be was speedily cured. I immediately procured the article and commenced cured. I immediately procured the article and commenced using it, and now, after having used less than six bottles, it am well and able to attend to my business. I send you this statement as an act of justice, only hoping it may ladouce the afflicted to make use of the right medicine, and thereby save them much suffering and expense. Those wishing to learn further particulars concerning my case will find me at 207 Greenwich street, where it will afford me great pleasure to communicate anything in relation to the above.

I am, with gratitude, yours, &c.

To Sears' Bible Biography.—This is a most beautifu work, so far as paper, printing, embellishments, and binding are concerned. It is an octavo volume, and contains 491 pages of letter press, illustrated with some of the most spirited engravings we have seen for a long time. The frontispiece, by Lossing, represents Doddridge's mother teaching him Scripture history by Dutch tides. This is an exquisite picture, and one on which the eye may rest with more than ordinary delight. We have not had time to read the work, but from the notices given of it by some of the most respectable journals, we judge it will be well received by the religious public. Price, \$2.50. HIGHLY IMPROVED MANIFOLD WRITER.—By this wonderful investion a letter and dup icate can be written in one operation with more ease and greater facility than a single letter with an ordinary pen and ink.

To the mercantile, professional and traveling part of the community this truly great invention is of infinite value as it is a great saving of Time, Trauslle and axpense. The principal advantage to be derived from the manifold writer is, that a copy of any document may be kept without any additional trouble to the writer, and without any necessity of using either an inkstand or a pen. The instrument used for writing is an agate point, consequently it never wears by use. For banks, insurance offices, merchants, men of business generally, lawyers, postmasters, editors, reporters, public officers, and all who may be desirons of preserving copies of their letters, documents, &c. with an inim-nse saving of time and the satisfaction of having an exact copy of what they have written, this will be found invaluable.

Francis's Manifold Writer has now been in successful operation two years, during which time the proprietor has had the pleasure of receiving the unfeigned app, shation of all whose observation it has come under. At the late fair of the American Institute the merits of the article were examined into by three of the most able chemists in the country, when preconnected it to be a very inventors and useful con-

NEW-YORK DAILY TRIBUNE. (Circulation 10,000.)

THE EXPERIMENT of issuing a cheap L cash paper, elevated in character and dignified in tone devoted to the true principles of the Government and sustaining the great Producing Interests of the Country, was commenced on the 10th of April, 1841. Although less than sed, the Daily circulation of THE NEW-YORK TRIBUNE is now nearly or quite 10,000 copies, reaching every quarter of the Union, while its sub-scription list numbers many of the very ablest and most distinguished men in the Country, including Governors, Senators, Members of Congress, &c. &c. These facts are stated only to dispel the common presumption that a Daily paper afforded at so low a price as Four Dollars per annum must necessarily cater for the tastes and minister to the prejudices of the ignorant and the trifling.

THE DAILY TRIBUNE is conducted by Horace Greeley, (formerly Editor of ' The New-Yorker,' ' The Jeffersonian,' and 'The Log Gabin,') ably assisted in the several departments of Commercial, City, Literary and General Intelligence. Although the sheet on which it is printed is of moderate size, yet the amount of fresh reading matter given daily (averaging twelve close columns) can hardly be exceeded by that of any Daily paper in America. By the aid of stated correspondents at Washington and the most importast points throughout the Union, as well as private advices from friends possessing superior facilities for imparting information, the Editor hopes to render his paper the channel of the earliest and most authentic accounts of all important Political Movements in progress or in contemplation, Federal and State Legislation, with full and accurate returns of all transpiring Elections. The earliest accounts of Crops, Business, Prices, &c. with the events of the day, will also be thus given; while the Commercial Department of The Tribune is the special charge of an Assistant of ability and experience, who will give fresh and accurate reports of all doings in Produce, Goods, Stocks, Exchange, &c. &c. not only in this City, but at important points throughout the Un-

THE DAILY TRIBUNE is published every morning (Sundays excepted) on a fair royal sheet, neatly printed on clear and good type, and afforded to subscribers at the exceedingly low price of Foar Dollars per annum in advance. discoveries ever made in the art of Cutting.—JABEZ DAVIS has discovered the true principle in the Balancing and Drafting of Coats—which principle I have no doubt has been more studied than any other science, for all other sciences have been confined to but few compared with the thousands of the trade that have turned their attention to discover this point, both here and in Europe for this fifty years. It is an entirely original and self-varying system, anothing complicated, no matter in what position the person stands. When you draft the Coat, it works out every point perfectly correct. This system has been thore ughly attested by a number of the trade for eighteen months in New-York. Any of the trade wisking to obtain a good rule for Drafting Coats, with an original improvement on Vests, and other useful instructions in the general art of Cutting, are solicited to call at 156 Fulton st.
